PROFILE

Passionate Computer Science undergraduate with experience in AI with proficiency in Python. Experienced in the full software development lifecycle, with hands on experience building scalable full stack applications and developing end to end data models. Seeking to apply analytical and problem solving skills to architect impactful data solutions.

EDUCATION

Bachelor Of Technology In Computer Science And Engineering

10/2022 – 05/2026

Amrita Vishwa Vidhyapeetham , Amritapuri

- Current CGPA: 8.67 (at the end of 7th sem)

PROJECTS

Invoice Management System

Java, Spring Boot, MySQL

- Developed a full-stack invoice management platform with RESTful APIs for billing and customer management workflows.
- Implemented modular backend services and automated PDF invoice generation using Spring Boot and MySQL.

Personalized PDF Chatbot

OpenAI, FAISS, Python

- Engineered an end to end data pipeline for processing unstructured PDF data, utilizing advanced text parsing and semantic chunking.
- Built a scalable RAG workflow with FAISS vector search to ensure high-accuracy data retrieval and quality controlled LLM outputs.
- Deployed the system using Streamlit with secure file handling and an optimized interactive user interface.

Smart Energy Analytics Platform

Python, FastAPI, Cloud-based

- Architected a scalable data pipeline using FastAPI to handle real-time ingestion and processing of household energy data.
- Developed ETL workflows for anomaly detection, ensuring high data quality through robust validation and persistent storage.
- Engineered REST APIs and Streamlit dashboards to provide operational analytics and automated, rule-based alerting for performance tracking.

PUBLICATIONS

Multi-Relational Graph Neural Networks for Influence Minimization in Social Networks

ICCIS 2025, Research Project

- Proposed a multi-relational GNN framework for influence minimization on the Higgs Twitter Dataset.
- Reduced simulated misinformation spread by 80% by neutralizing the top 30% influential users.

SKILLS

Technical Skills

- Languages: Python, C++, SQL
- Backend & Web: Spring Boot, REST APIs, React.js
- Libraries & Tools: Pandas, NumPy, Scikit-learn, PyTorch, FAISS
- Tools: Git, Docker
- Core Concepts: Object Oriented Programming, Software Development Lifecycle

Non Technical Skills

- Soft Skills: Communication & Teamwork, Leadership, Critical Thinking, Adaptability, Problem Solving, Analytical Skills

CERTIFICATIONS

Data Scientist Associate

Datacamp

Tata Data Visualisation: Empowering Business with Effective Insights

Forage

Built executive level dashboards using Tableau and Power BI for a retail revenue analysis simulation, delivering data-driven presentations to senior leadership.
